

Cover Care & Cleaning

One of the best things about the rainfly material is the excellent cleanability. Just use mild soap and water with a soft deck brush and finish off with a rinse. Regular care and cleaning of the cloth rainfly is not only easy, it helps to maintain the life of the fabric.

General Cleaning:

- Spray or Brush off loose dirt
- Prepare a solution of 2 ounces mild soap (e.g. Woolite or Dawn dish washing liquid) and 1 gallon of lukewarm water
- Use a soft deck brush to clean
- Rinse thoroughly with cold water
- Air dry

Note: Fabric will require a re-treatment to restore its water repellency annually or as needed. The fabric manufacturer recommends using 303® Fabric Guard™.
